

YOUR COMPLETE HYPERBARIC CHAMBER SYSTEM SOLUTION

HyperbaricsRx offers one-stop-shopping for all of your system, equipment, training and service needs. We are authorized Ultra-Lite, Flexi-Lite and ANDI distributors just to mention a few. Our ANDI Certified Instructors take the time to answer your questions.

Each and every product in our line has been hand chosen after strict evaluation by our experienced professionals and we will gladly share with you our reasons why. **We strive to provide you with all of the information so you are able to make the right, most cost effective choices for optimal performance and maximum benefit the first time.**

UNMATCHED KNOWLEDGE AND EXPERIENCE

HyperbaricsRx has over 20 years of direct experience working with high and low pressure ultra-pure breathing gas delivery systems. While hyperbaric therapy has recently expanded into the mainstream medical community, its origins stem from treating scuba diving accidents.

We have been with ANDI from the beginning offering training programs in optimal breathing gas technology and custom, deep expedition level systems for field emergencies. **We are the technical and training experts that you need to speak with before making any equipment decisions.**

AFFORDABLE FINANCING PROGRAMS AND CONVENIENT PAYMENT OPTIONS

HyperbaricsRx offers several consumer and commercial financing programs including 0% interest for up to 15 months. We accept MasterCard, Visa, American Express, Discover, Cash, Checks and Wire Transfers.

ONSITE SET-UP, INSTALLATION AND TRAINING

HyperbaricsRx is a Certified ANDI Training Facility. Our Certified ANDI Instructors and ANDI Certified Hyperbaric Chamber Technicians will come to your home or office to install the system and train your family or staff. We also offer system specific Chamber Operator Certification courses. **Do not purchase a system from anyone unwilling (or unable) to train you how to safely and effectively use it.**

UNSURPASSED CUSTOMER CARE, SERVICE AND SUPPORT

HyperbaricsRx believes that a chamber placement, be it a purchase or a rental is the beginning of a relationship (not the end). Whether we are answering your initial questions, installing your chamber system, providing post-installation technical support, performing onsite routine maintenance, or certifying your staff as Hyperbaric Chamber Operators we do it all with a level of personalized customer care that you will not find anywhere else. **Experience the HyperbaricsRx difference today.**

FAST DELIVERY AND MADE IN THE USA

HyperbaricsRx offers American manufactured products. Our Portable Hyperbaric Chamber Systems and many of our other products are made right here, in the USA. **This enables us to consistently have chambers and supporting accessories in stock and available for immediate shipment.**

CERTIFIED SERVICE TECHNICIANS AND FACTORY ORIGINAL PARTS

HyperbaricsRx services and stocks parts for all of the equipment we offer. Our professional staff will provide you with the correct information to properly care and maintain your equipment for many years of safe operation. We perform onsite routine maintenance, retrofits and upgrades. **We are your source for replacement Compressor Filter Elements, Intake Filters and much more.**

POST INSTALLATION TECHNICAL SUPPORT

We do not outsource our technical support, we deal with you personally. As a matter of fact we are one of the sources whom other third party companies send their clients to. Why get caught in after-the-fact red tape while your tech support is authorized (assuming that any is provided at all) when you can deal direct with us as part of our included services. **This is yet another reason to choose HyperbaricsRx.**
